

Freire's consciousness), specific research questions and some exposition on countries' own data within the categories.

Taking into account that the thesis follows a clear and pertinent plan, that the research work tends to show awareness over the research process and the outcomes obtained, which results in a better understanding of the reality that the kinds of "Grammar of Schooling" are most influenced by educational policies, teachers' experience – personal inclusive, and their relationships with the in-school community, we are of the opinion that it can proceed to public examination, in accordance with the guidelines of the Doctoral Program, the European Doctorate in Teacher Education – European Joint Degree (EDiTE-EJD).
